

### **Civil Engineering Estimator**

*Experienced Civil Engineering Estimator required for longstanding civil engineering contractor based in Carlisle. The candidate should have over 5 years' experience of developing bids and tenders for all types of civil engineering projects ranging from £0 to £8m in value. The candidate should be able to build up tenders from first principles as well as utilising the supply chain for specialist items, so site experience in their early career would be an advantage. Experience of computer based estimating packages would also be desirable, as is a firm competence in IT. The role would be ideally based in the Carlisle Head Office, but there may be an option to work from our Selkirk office. some remote/home working is anticipated.*
