

NEC4 CONTRACT DATA AND Z CLAUSES

Why should you attend this workshop?

This one-day workshop will review in detail the contents of NEC4 Contract Data within both ECC and ECS contracts. It will review each section of contract data and what information should be completed by one party and understood as a result by the other party. It will consider the elements from a tender point of view but also what parts then come into play on a live contract.

You will learn about:

Each section of contract data will be reviewed and considered, i.e.

- General
- Contractor's main responsibilities
- Time
- Quality Management
- Payment
- Compensation events
- Liabilities
- Resolving disputes
- Secondary options
- Data for schedule of cost components

Attendees of this course will have a much clearer understanding of the content of contract data part one and part two, and how they should be interpreted/completed by the relevant party.

Typical bespoke project amendments (Z clauses) will also be considered in terms of how they can change the rules and principles of the contract. The session will focus on the types of amendments to look out for at tender stage that could significantly alter the risk profile for a Contractor/Subcontractor.

A few practical case studies for the second half of the workshop will draw out the key elements around contract data and Z clause amendments for attendees to ensure that the elements have been understood and will be able to be applied in practice.

Recommended for:

This workshop is recommended for everyone currently involved with or about to be working under an ECC or ECS contract including project managers, contract managers, quantity surveyors, clients, consultants, planners, to make sure they understand which elements of contract data will affect their own specific roles within their organizations. This session will be suitable for those who are relatively new to these forms of contract as well as those who are already more experienced in the contract and looking to enhance their level of knowledge and understanding.
