

What is a Degree Apprenticeship?

An **alternative** route to gaining a degree - degree apprenticeships are designed to propel students into the world of work and fill high-level skills gaps by tailoring learning to specific business needs

A training programme in which you get **on-the-job training combined with study** for a degree level qualification at the same time.

Degree Apprenticeships are **designed by industry** to bring together the very best in higher and vocational education.

Apprentices **achieve a full Bachelor's or Master's degree** as a core component of the apprenticeship.

On a Degree Apprenticeship, the individual will be **tested on their academic learning**, as well **as their wider skills and ability to do a job.**

Our Journey
