

## UPCOMING WEBINAR

Civil Engineering R&D Tax Credits:  
The Compliance Standard Has  
Changed – Has Your Claim Evolved?

15 April | 12:30-13:30

## R&amp;D TAX CREDITS

The UK R&D Tax Credit scheme has changed over the past 12-18 months.

Increased **HMRC scrutiny**, new **pre-notification** requirements and **merged scheme rates** have changed both how civil engineering claims are reviewed and how value is realised.

For many businesses, the technical definition of R&D hasn't changed; but the evidence standard and compliance expectations have.

This session will provide a practical, civil engineering-focused update on how recent changes are impacting claims in real terms.

## SPEAKERS

Led by Leyton's R&D Tax Credit specialist, experienced working on civil engineering claims, this webinar will share insight into how claims are being assessed today and how businesses are protecting value, while strengthening compliance.

Robert Young, MEng  
**ASSOCIATE DIRECTOR**

Houda Mouradi  
**ASSOCIATE DIRECTOR**

## AGENDA

We'll explore both the commercial and technical considerations shaping today's environment, including:

- What the **merged scheme** means for net benefit and forecasting
- Updates to cost treatment, **subcontractor rules** and **contracted R&D**
- How HMRC is interpreting civil engineering activity in practice
- Where **enquiry risk** typically arises
- What **robust, defensible technical evidence** now looks like
- How **internal processes** can support compliant, enquiry-ready submissions

## WHO IS THIS SESSION FOR?

This webinar is for civil engineering contractors and consultancies who are claiming R&D Tax Credits, considering a first claim, or reviewing their approach under tighter compliance rules. Ideal attendees:

- Finance Directors / CFOs / Finance Managers
- Managing Directors / Owners
- Heads of Engineering / Technical Directors
- In-house tax / accounting teams
